Rabbula Gospels - PDF version

Leonardo De Luca - June 2025

The Rabbula Gospels is one of the most important and visually stunning manuscripts of the early Christian tradition. Created in 586 AD in Syria, it is renowned for its vivid illuminations, early depictions of the Crucifixion and Ascension, and its unique blend of Syriac text and Byzantine iconography. The manuscript is an exceptional witness to the religious, artistic, and cultural dynamics of the late antique Near East.

For many years, the Biblioteca Medicea Laurenziana in Florence (Italy), which houses the original manuscript under the shelfmark Plut. I.56, made a high-resolution digital facsimile available to the public through its digital library platform, TECA.

However, the TECA version of the Rabbula Gospels is no longer accessible through the library's official website, likely due to platform deprecation or restructuring. As a result, scholars and the general public have encountered significant obstacles in accessing this critical artifact of Christian heritage.

Fortunately, a complete snapshot of the TECA digital facsimile was preserved by the Wayback Machine (archive.org), allowing access to the full set of high-resolution images through archived links.

This document explains how the Rabbula Gospels manuscript was recovered from the Wayback Machine and recompiled into a single navigable PDF file, preserving public access to this extraordinary manuscript in the absence of its original digital home.

Determine the image range from TECA

I inspected two example image URLs from the Biblioteca Medicea Laurenziana's TECA digital archive:

First image:

```
http://teca.bmlonline.it/ImageViewer/servlet/ImageViewer?
idr=TECA0000025977&azione=showImg&sequence=21
```

Last image:

```
http://teca.bmlonline.it/ImageViewer/servlet/ImageViewer?
idr=TECA0000026554&azione=showImg&sequence=598
```

From these URLs I concluded that:

- Both the TECA ID (id) and the sequence number increase progressively.
- I had to collect all the full archived URLs by incrementing both the TECA ID numbers and the sequence numbers by 1, from the first to the last image.

Generate the list of image URLs

I wrote a small script to generate the list of URLs based on the following pattern:

```
http://teca.bmlonline.it/ImageViewer/servlet/ImageViewer?
idr=TECA000002XXXX&azione=showImg&sequence=YYY
```

Where `XXXX` goes from `5977` to `6554` and `YYY` from `21` to `598`

The resulting list was saved into a file named `urls.txt`.

Download the images using `wget`

With the list of URLs prepared, I used the following command:

```
wget -i urls_teca.txt -P teca_images
```

All images were saved into the `teca_images/` folder, though most files did not have an extension.

Rename the files to add `.jpg` extension

To allow processing as images, I renamed the files:

```
[python]

import os
folder = "teca_images"
for filename in os.listdir(folder):
 if not filename.lower().endswith(".jpg"):
     os.rename(
         os.path.join(folder, filename),
         os.path.join(folder, filename + ".jpg")
     )
```

Convert all images into a single PDF

```
[python]
```

```
from PIL import Image
import os

folder = "teca_images"
images = []

    for filename in sorted(os.listdir(folder)):
        if filename.lower().endswith(".jpg"):
            img = Image.open(os.path.join(folder, filename)).convert("RGB")
            images.append(img)

        if images:
            images[0].save("teca_manuscript.pdf", save_all=True,
append_images=images[1:])
```

Final Output

The result is a single file:

```
`teca_manuscript.pdf`
```

…containing all manuscript images in sequential order, covering many TECA IDs and hundreds of sequences.

COD. 56.

C M

ED. BIAGI e MUÑOZ
FOTOGRAFIE 14 e 4 TAV. COLORI

III.

Questo Codice è chiamato inestimabile dal Zangio. E'
senza punti scritto con lettere quadrate nell'anno DLXXXVI.
di Cristo. Il Carattere è caldaico coll'armonia de' dieci
Canoni di Ammonio, e di Eusebio Panfilo Cesareense. Appar-
teneva al monastero di S. Giovanni in Zagba Città
della Mesopotamia. Codice più raro di questo non
sò che altrove si trovi. Non vi si legge la storia
dell'adultera, non vi si interpetra la parola
Lammasabactani. Egli è scritto sotto Pelagio II. e
l'Imperator Maurizio Tiberio. Lo scrittore si
chiama Rabula Calligrafo. Di questo Codice ne
abbiamo la descrizione di Ambarachio, cioè del P. Benedetto
Di Montfaucon, e d'Asseman. Questo Codice passò dopo il
monistero di S. Giovanni, al monistero di S. Maria
di Maiphuc nel Secolo XI. dipoi al monistero
di S. Maria di Kannubin, e vi stette fino al
MCCCCXCVII. nel qual tempo passò in questa
Lib.ra Medicea.

dev

e quindi al Monastero di S. Maria in Kannubin situato nella vallata Gibbense del monte Libano sulle rive del Xanto, dove restò fino all'anno 1497. in cui passò alla nostra Biblioteca. Questo Codice membranaceo in fol. scritto col carattere antichissimo de' Siri, Caldaico Estranghelo, cioè rotondo, e in lettere maiuscole è del VI. Secolo, composto di pagg: 292.

III.

I sacrosanti quattro Evangeli di N. S. Gesù Cristo scritti in Siriaco dal Rabula Calligrafo nel Monastero di S. Giovanni in Zagba Città della Mesopotamia ai 6. di Febbrajo dell'anno 897. che corrisponde al 586. di G. C. Le prime 14. pagine rappresentano, in varii colori miniate, alcuni fatti del vecchio e del nuovo Testamento. Seguono cinque pagine bombicine aggiunte posteriormente, che contengono l'Indice delle lezioni Evangeliche, le quali si leggono nel corso dell'anno nella Chiesa de' Siri, ed a questo corrispondono quasi in tutte le carte del Codice alcune note aggiunte da mano posteriore nel margine. Il carattere di quest' Indice si crede del XII. Secolo, come pure quello delle note apposte nel margine. Vi sono nel corpo del Libro altre lezioni diverse dalle citate, e della medesima antichità del Codice, e scritte dalla medesima mano. La presente versione de' Vangeli, dai Siri si chiama semplice o Volgata, di cui fino dai tempi degli Apostoli si valsero le Chiese della Mesopotamia della Siria, e dell'Assiria. Manca la prima pagina del Vangelo di S. Matteo, cioè fino al XXIII. versetto. Le parole Eli Eli lammasabactani che sono Siriache non s'interpretano da S. Matteo, ma bensì da S. Marco e S. Luca; onde può trarsi argomento che S. Matteo scrisse in Siriaco, e che questa sia stata la lingua di cui si valsero il Redentore e gli Apostoli. Similmente si tace affatto la storia dell'adultera che occorre al Capitolo VIII. di S. Giovanni. Si rilevano da questo Codice molte utilissime tradizioni riguardo al culto dei Santi, alle orazioni da recitarsi per i Defunti, e altri riti, intorno ai quali la Chiesa Romana vien dagli Eretici lacerata, ed altre interessantissime cognizioni per la Storia Ecclesiastica, e specialmente concernenti l'antichissima comunione della Chiesa Maronitica colla Romana, e in alcuni fogli appariscono notati sul margine per mano dei Patriarchi Antiocheni, e dei Maroniti a' quali apparteneva questo Codice, varii monumenti da non disprezzarsi. Dal Monastero di S. Giovanni in Zagba, ove fu scritto, passò questo Codice circa il Secolo XI. per ordine dei Patriarchi di Antiochia al Monastero di S. Maria di Maiphuc nella Provincia Botrense,
